

[Live Webinar] HSI In Action: Everything an Administrator Needs to Know

HSI will be hosting a live webinar, “HSI In Action: Everything an Administrator Needs to Know,” on Wednesday, May 13 from 10:00 am – 10:30 am PDT.

Join us to see HSI LMS in action—and learn essential administrative features to evaluate when comparing platforms.

Choosing the right LMS is a critical decision. The individual responsible for LMS administration should be part of the buying process as they are responsible for managing HR compliance, reporting, and workforce development. In this webinar, we’ll break down the essential administrative features to evaluate when comparing platforms: from automation and reporting to integrations and scalability. You’ll walk away with a practical framework to confidently assess vendors and select an LMS that supports your full training program while saving your team time.

In this practical, demo-focused webinar, you’ll see HSI’s LMS in action through real administrator workflows from assigning training by role or location and managing recurring compliance to customizing reports and integrating with HR systems. We’ll show how automated notifications, flexible training plans, and configurable reporting help streamline administration while supporting compliance and workforce development. You’ll also get a look at how HSI’s broader platform including safety observations, safety actions, safety alerts, and AI-driven capabilities extends value beyond course delivery.

Key Take-Aways Include:

- Designing & Assigning: training by role, team, or location
- Recurring training & automated notifications: compliance consistency
- Reporting: out-of-the-box vs. customized
- Uploading & managing: proprietary training content
- Comparing LMS vendors: bonus checklist
